SUN DISCOVER
YOUR
FUTURE

Let's make a difference this year...

A portfolio of face-to-face workshops for schools in the Southern Universities Network.

We are pleased to be able to offer a range of face-to-face workshops this year to help your Years 10 and 11 students reach their potential at GCSE.

The workshops will be delivered by Twenty Twenty Learning at your school. They will accommodate groups of 25 students and can be delivered during school time, on Saturdays or in holidays. Each workshop is designed specifically for your group of students – you tell us the exam board, the focus and the target grade range of the group and leave the rest to us.

Twenty Twenty Learning consultants **ensure every workshop is stimulating, challenging and enjoyable**. Each student receives a full colour booklet to work on during the day and take away to use for further review and revision activities. Following the workshop, you will receive **collated evaluations** which measure students' levels of confidence before and after the programme.

Consultants have enhanced DBS certificates and are experienced classroom practitioners. **All equipment and resources are provided**, you just need to supply a classroom and data projection facilities.

Our Workshops...

GCSE English Language

Aimed at years 10 and 11, the workshops are designed as a core subject booster for your students. The focus can be a specific paper, specific questions or specific skills (or a combination). Programmes are designed in partnership with you, covering subject topics most suitable for your students. Here are some ideas schools requested last academic year:

- Writing for purpose (skills for fiction and non-fiction writing)
- AQA Papers 1 and 2, both Questions 4 (evaluation and comparison)
- Edexcel Transactional Writing
- AQA Paper 2 Writers' Viewpoints and Perspectives

GCSE Maths

Use the workshops as a way of introducing new topics or embedding skills already taught. Again, workshops can be focused on broad topics (e.g. Geometry and Measure) or a mixture of specific sub-topics. Here are some workshops delivered last academic year:

- Ratio, Proportion and rates of change (Higher)
- Fractions, standard form, averages and percentages (Foundation)
- 2D shapes, angles, transformations (Foundation)
- Trigonometry, surds, real life graphs, similar shapes, iteration (Higher)

Next Steps...

If you are interested in any of these workshops for your students, give us a call today to find out more information and start your application. Please ensure you follow the guidelines provided by SUN on student selection.

For more information, please contact:

L.M.Naglik@soton.ac.uk or Karen.Evans@20-20learning.com

For an informal chat regarding workshop content, please phone Karen on 01279 877955.
